INDEX TO VOLUME XXIV

(Asterisked entries are titles.)

ABBEY, HELEN, An Examination of the Reed-Frost Theory of Epidemics, 201-232
Age, old, and blood changes, 57

BASS, ROBERT E., Erratum to the paper "Unity of Nature," 86
BERNSTEIN, MARIANNE E., Studies in the Human Sex Ratio. 2. The Proportion of Unisexual Sibships, 35-43
Birth statistics, Japanese, 44
Blood changes in old age: A clinical and statistical study, 57
Blood groups, A–B–O system, genetic frequencies of in mixed populations, 12

Children, methodology in the study of physical measurement, 117
Color, skin, spectrophotometric measurements of, 25
DORN, HAROLD F., Prospects of further decline in mortality rates, 235

ELLISON, J. McK., *see* Renbourn, E. T.
Environmental growth factors and selective migration, 262
Epidemic theory, historical review, 145
Epidemic theory, mathematical developments, 167
*Estimation of the T-Year Survival Rate from Follow-Up Studies over a Limited Period of Time, 87
*Examination of the Reed-Frost Theory of Epidemics, An, 201

*Family as a unit in public health research, The, 1
Finger prints, quantitative analysis, 53
Follow-up studies, estimation of T-year survival rate from, 87

GATES, R. RUGGLES, Studies of Interracial Crossing. I. Spectrophotometric Measurements of Skin Color, 25-34
Genetic and social factors, influence of, on infant weight, 309
Genetic frequencies of A–B–O system in mixed populations, 12
GREENBERG, B. G., *see* Bryan, A. Hugh.
Growth factors, environmental, and selective migration, 262
Growth of North American Negro infants, 290

Health, research in, and the family unit, 1
HEWITT, DAVID, and STEWART, ALICE, The Oxford Child Health Survey. A Study of the Influence of Social and Genetic Factors on Infant Weight, 309
*Historical review of epidemic theory, 145.

Immaturity points, determination of, in physical measurements of school children, 117
Infants, North American Negro, size at birth and growth during the first postnatal year, 290
Interracial crossing and measurement of skin color, 25

Japanese birth statistics, 44

LASKER, GABRIEL WARD, Environmental Growth Factors and Selective Migration, 262
LITTELL, ARTHUR S., Estimation of the T-Year Survival Rate from Follow-Up Studies over a Limited Period of Time, 87-116

MAIA, JOAQUIM DE OLIVEIRA COSTA, Some Mathematical Developments on the Epidemic Theory Formulated by Reed and Frost, 167-200
Mathematical developments on the epidemic theory formulated by Reed and Frost, 167
Maturation, sexual, determination of, in the physical measurements of school children, 117
Measurements of school children, methodology, 117
MEREDITH, HOWARD V., North American Negro Infants: Size at Birth and Growth During the First Postnatal Year, 290
MERRELL, MARGARET, The Family as a Unit in Public Health Research, 1-11
*Methodology in the Study of Physical Measurements of School Children: Part II. Sexual Maturation—Determination of Immaturity Points, 117
Migration, selective, and growth factors, 262
Mortality rates, prospects of further decline in, 235

*North American Negro Infants: Size at Birth and Growth During the First Postnatal Year, 290
*Notes on Japanese birth statistics, 44

*Oxford Child Health Survey. A study of the influence of social and genetic factors on infant weight, the, 309

Physical measurements of school children, methodology, 117
Populations, statistical analysis of, by the A–B–O system, 12
*Prospects of further decline in mortality rates, 235
Public health research and the family unit, 1

*Quantitative analysis of finger prints, A, 53

Race, interracial crossing, and measurement of skin color, 25
Reed-Frost theory of epidemics, examination of, 201
Reed-Frost theory of epidemics, mathematical developments, 167
RENBOURN, E. T., and ELLISON, J. MCK., Some Blood Changes in Old Age: A Clinical and Statistical Study, 57-85
Research in public health and the family unit, 1
Review, historical, of epidemic theory, 145
RIFE, DAVID C., A Quantitative Analysis of Finger Prints, 53-56

SERFLING, ROBERT E., Historical Review of Epidemic Theory, 145-166
Sex ratio, human, proportion of unisexual sibships, 35
Sexual maturation, determination of immaturity points, 117
Sibships, unisexual, proportion of, 35
Skin color, spectrophotometric measurements of, 25
Social and genetic factors, influence on infant weight, 309

*Some blood changes in old age: a clinical and statistical study, 57
*Some mathematical developments in the epidemic theory formulated by Reed and Frost, 167
Spectrophotometric measurements of skin color, 25
*Statistical Analysis of the A–B–O system in mixed populations, 12
'Statistical Analysis of the A–B–O system in mixed populations, errata, 233
STEVENS, W. L., Statistical Analysis of the A–B–O System in Mixed Populations, 12
STEVENS, W. L., Errata to the paper "Statistical analysis of the A–B–O system in mixed populations," 233
STEWART, ALICE, see Hewitt, David
*Studies in interracial crossing. I. Spectrophotometric measurements of skin color, 25
*Studies in the human sex ratio. 2. The proportion of unisexual sibships, 35
Survival rate, T-year, from follow-up studies, 87

TAKAHASHI, EIJI, Notes on Japanese Birth Statistics, 44
T-year survival rate from follow-up studies, 87
